make sense given what you've
already studied?**

MASTER'S

“Your bachelor degree should dictate your Masters degree, you should understand the academic foundation and entry requirements of your intended programme, and where there is no natural alignment, your career history must align with the Master's degree discipline”

**“Don't choose a course without understanding the
academic pathway.”**

CAREER PROGRESSION

**Where do you want this Master's to
take you?**

**What
career
problem
am I trying
to solve
with this
Master's?**

EMPLOYABILITY

Don't ask only: "Is this course in demand?"
